# I'm Building an AI Chatbot on Amazon Lex!

Delvin Dsouza (dx)

The Project

To connect or get the support as quickly as possible with a resolution to the user's problem. And also getting familirize with the AWS system.

Hold me accountable!

For Every Series I will give 1 day atleast and finish it in 5 days or within a week.

What is AI in chatbots?

The ability to understand User Text and Predict or Generate an Answer according to the Query it asked.

How does Amazon Lex simplify chatbot development?

Amazon Lex provides pre trained models, can able to build the logic. In terms of integration it can be able to scale, provide infrastructure and security. This service also helps to integrate with other AWS service like Lambda or Cloudwatch

Excited to share my progress - build a chatbot with me!
